

Best Buy Environmental Statement

Last revised: March 2015

Best Buy is committed to using the strength of our people and our organization to:

- Systematically manage and continuously improve the environmental performance of our operations and supply chain.
- Provide customers a variety of product options and the best information available so they can make sustainable choices.
- Continue to develop appropriate waste minimization, pollution prevention and accessible recycling programs.
- Comply with all applicable environmental laws and regulations.
